Spectra Adaptive

The diversified Spectra blend with an adaptive overlay that dials gross exposure down (sometimes to near-zero) when market conditions turn hostile.

Spectra Adaptive is a market-neutral portfolio that combines the same six orthogonal factors as Spectra (Enhanced Momentum, Enhanced Carry, Retail Flow, Margin Risk, Altair and Mean Reversion).

The Adaptive overlay reduces the portfolio's gross exposure when the market conditions are adverse. This may result in prolonged periods of very small (<10%) gross exposure.

The asset universe consists of the most liquid and actively traded assets, identified on a rolling basis – various techniques are employed to keep it both stable and relevant, as well as survivorship-bias free.

To balance each asset's risk contribution, positions are scaled according to the inverse of their rolling volatility.

The portfolio is rebalanced daily, with hourly updates provided, 5 minutes past the hour (UTC).

TOP 40 CROSS-SECTIONAL MULTI-FACTOR PORTFOLIO

Download Returns (CSV) →

Blends 6 orthogonal factors into a single diversified return stream across the rolling Top 40 universe (point-in-time). Asset positions are sized by inverse rolling volatility; rebalanced daily.

PERFORMANCE

Report Period Start Date Jan 2020 · End Date Apr 2026

Cumulative Returns

MTD	Last Month	YTD	1Y
0.7%	0.4%	0.9%	39.0%

Annualised Returns (CAGR)

1M	3M	1Y	3Y	5Y	SI
9.1%	2.4%	39.2%	88.1%	61.5%	132.7%

RISK PROFILE

Realised Volatility (annualised)

1M	3M	1Y	3Y	5Y	SI
9.0%	5.2%	13.4%	23.2%	20.7%	26.4%

Max Drawdown

%	Date
−17.9%	2023-01-31

CUMULATIVE RETURN

Note – Performance is for the Spectra Adaptive multi-factor portfolio (component factors blended and rescaled across the Top 40 universe, rebalanced daily); demonstrative only, not a tradable product. Past performance is not indicative of future results.
