Spectra High-Turnover

The Spectra blend tuned for a higher-turnover regime – extracts more of the short-horizon alpha at the cost of higher gross trading volume.

Spectra High-Turnover is a market-neutral portfolio, optimised for higher turnover, that combines seven orthogonal factors: Enhanced Momentum, Enhanced Carry, Retail Flow, Margin Risk, Altair, Mean Reversion and Enhanced Mean Reversion.

The asset universe consists of the most liquid and actively traded assets, identified on a rolling basis – various techniques are employed to keep it both stable and relevant, as well as survivorship-bias free.

To balance each asset's risk contribution, positions are scaled according to the inverse of their rolling volatility.

The portfolio is rebalanced daily, with hourly updates provided, 5 minutes past the hour (UTC).

TOP 40 CROSS-SECTIONAL MULTI-FACTOR PORTFOLIO

Download Returns (CSV) →

Top 40 market-cap universe • 200% gross exposure (100% long / 100% short). Blends 7 orthogonal factors into one diversified, point-in-time stream; inverse-vol sized, rebalanced daily.

PERFORMANCE

Report Period Start Date Jan 2020 · End Date Jul 2026

Cumulative Returns

MTD	Last Month	1M	3M	YTD
−2.7%	−0.9%	−2.3%	17.5%	1.2%

Annualised Returns (CAGR)

1Y	3Y	5Y	SI
31.8%	76.8%	61.7%	125.6%

RISK PROFILE

Realised Volatility (annualised)

1M	3M	1Y	3Y	5Y	SI
18.1%	19.9%	20.5%	27.1%	26.1%	31.3%

Max Drawdown

%	Date
−27.5%	2022-03-04

CUMULATIVE RETURN

Note – Performance is for the Spectra High-Turnover multi-factor portfolio (component factors blended and rescaled across the Top 40 universe, rebalanced daily); demonstrative only, not a tradable product. Past performance is not indicative of future results.
