

Polaris

A volatility-normalised momentum read – identifies assets whose drift is strong relative to their own noise floor.

Polaris is a proprietary market-neutral measure designed to identify short-term, normalised momentum effects across crypto assets.

Its universe consists of the most liquid and actively traded assets, identified on a rolling basis – various techniques are employed to keep it both stable and relevant, as well as survivorship-bias free.

To balance each asset's risk contribution, positions are scaled according to the inverse of their rolling volatility.

The portfolio is rebalanced daily, with hourly updates provided, 5 minutes past the hour (UTC).

EXAMPLE TOP 40 CROSS-SECTIONAL PORTFOLIO

Long and short the dynamic, rolling Top 40 universe (point-in-time), sized by the factor's cross-sectional strength. Rebalanced daily.

PERFORMANCE

Report Period Start Date Jan 2020 • End Date Apr 2026

Gross Rate of Return					Annual Performance (%)							Since Inception
1M	3M	1Y	3Y	5Y	2020	2021	2022	2023	2024	2025	YTD	SI
-1.1%	-7.2%	35.1%	387.4%	497.9%	178.4%	152.6%	19.5%	-4.7%	138.0%	67.4%	-10.3%	2760.8%

RISK & RETURN PROFILE

Realised Volatility (annualised)				Return-to-Risk Ratio				Max Drawdown	
1M	3M	1Y	3Y	1M	3M	1Y	3Y	%	Date
20.4%	28.3%	29.6%	30.0%	-0.05	-0.26	1.19	12.90	-31.2%	2023-04-21

CUMULATIVE RETURN

Note – Performance is for an illustrative single-factor portfolio (positions sized proportionally to the factor signal across the Top 40 universe, rebalanced daily); demonstrative only, not a tradable product. Past performance is not indicative of future results.

Factor Analysis

[Download Factor Data \(CSV\)](#)

Diagnostics on the raw factor values, independent of portfolio construction: the quantile and IC plots show whether the signal cross-sectionally separates out- from under-performers, and how consistently. Computed point-in-time on the rolling Top 40 universe (the live factor spans many more tokens – see the raw factor-data CSV in the data room).

Mean Forward Return by Quantile • demeaned

Cumulative Alpha by Quantile • demeaned, 1D

Information Coefficient (Spearman)

Mean 0.0011 • Std 0.2323 • IR 0.00 • 48.6% positive • 1D

ABOUT UNRAVEL

Unravel publishes a catalog of cross-sectional, market-neutral crypto factors – each with point-in-time history and live signals – designed to be combined into multi-factor portfolios that diversify away single-factor risk. Full catalog, methodology and API at unravel.finance; see the materials below.
